

“In just one year of testing over 100 T-Frame motors, ALL-TEST saved us more than \$25,000 in inspection fees!”

“For several years, we have been using ALL-TEST Pro’s AT33 IND™ motor testing instrument as a screening tool for our T-frame motors. A quick, 2-minute test gives us an immediate reading of the condition of the stator and rotor.”

“The AT33 IND has saved us hundreds of hours in labor time that would’ve been required for other, more time-consuming testing processes. We quickly know if the motor needs a rewind, saving our customers time and money.”

— Dreisilker Operations Manager

For over 60 years, Dreisilker Electric Motors, Inc. has been providing complete electric motor solutions to commercial, industrial and municipal customers. They also specialize in Motor-Safe™ Repair methods to improve motor reliability, increase uptime and save energy. For more information, visit their website at: www.dreisilker.com
